

## Side Chair

### Medium

Walnut, with hard pine corner blocks and slip seat frame

### Description

The side chair features front cabriole legs that end in pad feet, seat rails that do not have a molding on their top edge, a solid vase-shaped splat, and a shaped crest rail that ends in large splayed ears. Ogee corner brackets are nailed in place on the front legs. The side seat rails were fashioned with through tenons where they meet the rear legs, which are chamfered and rake backward below the rails. A beaded molding outlines the rear stiles above the seat rails, as well as the crest rail.

### Dimensions

39.25 × 20.25 × 20.25 in. (99.7 × 51.4 × 51.4 cm)
