## Evening Coat

### Medium

Voided plush velvet, satin, lace, silk georgette

### Description

A woman's evening coat, of striking golden ivory plush voided velvet in an Art Nouveau-influenced pattern of tasseled ears of corn and corn stalks. The open front coat closes with a single hook-and-eye fastening at the throat and is styled with a loose, draped fit and full sleeves slightly gathered at forearms for additional draping and fullness. The entire coat is lined with a heavy golden ivory satin and is padded with a thick material, possibly flannel, for winter wear. Both right and left side seams are slit to the hips to accommodate the wearer's full skirts. Wide ivory lace panels edge the coat's short capelet collar, sleeves, front, and hem, with lightweight ruffled black silk georgette linings.
