

Basic Detail Report

Kast

Primary Maker

Matthew Egerton Jr.

Medium

Sweet gum (identified through microanalysis in 1979 by the U. S. Department of Agriculture in Madison, WI), white and yellow pine secondary woods, and walnut applied panels

Description

A widely overhanging cornice projects over a pair of doors with central raised panels framed by applied moldings. The center stile is not architectural but is attached to the right door. The center, left, and right stiles have pairs of applied narrow vertical walnut panels framed by applied moldings. Short, horizontal walnut molding pieces, known as glyphs, are applied above, between, and below these

narrow vertical panels. The base contains two solid front panel drawers with lipped edges set side by side, separated by square walnut panels framed with molding and set on point at the left, center, and right of the two drawers. Both drawers have a single brass bail pull with oval backplates. There are two dovetailed bracket front feet and two simple board back feet. The doors open to reveal the interior with two board shelves. The upper shelf has a small storage drawer mounted on its underside.

Dimensions

76.5 × 74.75 × 26.5 in. (194.3 × 189.9 × 67.3 cm)
